

# MIDLAND METROLOGY LTD

## Caliper Gauges

### Digital Internal Caliper Gauges

Ideal for measuring bores, internal grooves, and other hard-to-reach inside dimensions

#### Key Features

- Compact, user-friendly design for easy portability and storage
- Auto-adjusting analogue-style display for intuitive reading
- Large, high-contrast LCD screen with clear digital readout
- Dual unit functionality: easily switch between metric (mm) and imperial (inch) measurements
- Equipped with data output for digital integration and measurement logging
- Supports both ABS (Absolute) and INC (Incremental) measurement modes
- Includes preset memory and reset functionality for efficient operation
- Shock-resistant and dust-proof construction for reliable use in industrial environments
- Supplied with battery—ready for immediate use out of the box

Product	Specification	Availability
Digital Internal Caliper Gauge 5-25mm/0.2-1.0in	Range: 5-25mm/0.2-1.0in / Leg Length: 80mm	✓
Digital Internal Caliper Gauge 20-40mm/0.8-1.6in	Range: 20-40mm/0.8-1.6in / Leg Length: 80mm	✓

## Digital External Caliper Gauges

These gauges are ideally suited for measuring external grooves and other hard-to-reach outside dimensions.

### Key Features

- Built for durability with a hardened stainless-steel body; shock- and dust-resistant for reliable performance in workshop environments
- Precision movement supported by 7 fully jewelled bearings for smooth and accurate operation
- Adjustable bezel allows for quick and easy zero-setting and clear readability
- Versatile mounting options with dovetail slots and clamping points on the top, back, and front of the body
- Compact, user-friendly design; supplied in a protective case for safe storage and easy transport

Product	Specification	Availability
Digital External Caliper Gauge 0-20mm/0.0-0.8in	Range: 0-20mm/0.0-0.8in / Leg Length: 80mm	✓
Digital External Caliper Gauge 20-40mm/0.8-1.6in	Range: 20-40mm/0.8-1.6in / Leg Length: 80mm	✓
