

MIDLAND METROLOGY LTD

SCREW PLUG GAUGES (METRIC) – GO/ NO GO

The gauges are ideal for measuring hole sizes and determining if the hole is within the upper lower limits of the components tolerance. The hole size can be determined by using go and no go plug. Made from hardened alloy steel for longer tool life and durability from machine shop wear.

Key Features

- High quality hardened steel for durable tool life
- Fine ground screw threads
- Double- ended plug screws
- Can identify both GO and NO Go plug. Made from hardened alloy steel for longer tool life and durability from machine shop wear.

**We also have a variety of used
Imperial Screw Gauges. Please let us
know your requirements. We are sure
we can help!**
